## **DETAILED ACTION**

This Office action is in response to application papers filed on 26 February 2004 and to applicant's election filed on 19 October 2005.

### ***Election/Restrictions***

1. Applicant's election without traverse of Group I, claims 1-7, and cancellation of the non-elected claims 8-15 in the reply filed on 19 October 2005 is acknowledged.

### ***Drawings***

2. Figure 4C should be designated by a legend such as --Prior Art-- because only that which is old is illustrated (see page 15, lines 3-7, 15-17). See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the

Art Unit: 2813

examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: Semiconductor Device that Includes Plural Types of Dummy Patterns on a Wiring Layer.

4. The disclosure is objected to because of the following informalities:

On page 12, line 22, change "step 5" to --step S5'-- because Fig. 8 includes a step S5', but not a step 5'; and

On page 13, line 12, change "step 5" to --step S5'-- because Fig. 8 includes a step S5', but not a step 5'.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2813

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Motoyama et al. (US 6,099,992).

Referring to Fig. 7A and column 9, lines 16-60, Motoyama et al. disclose a reticle for forming both dummy patterns and interconnection patterns on a semiconductor substrate that includes  $1.65\text{ }\mu\text{m}$  by  $1.65\text{ }\mu\text{m}$  square dummy patterns as well as dummy pattern E, which has essentially the same length ( $1.63\text{ }\mu\text{m}$ ) and a narrower width ( $0.54\text{ }\mu\text{m}$ ). These are all of the limitations set forth in claims 1-7 of the applicant's invention.

7. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Ozawa et al. (US 2002/0063335 A1).

Referring to Fig. 12C and paragraphs [0103] to [0115], Ozawa et al. disclose a wire layout corresponding to a semiconductor integrated circuit that includes wires (108, 109, 110) and dummy patterns (113). The dummy patterns (113) include different sizes and shapes with squares as the largest dummy patterns (i.e. the patterns next to wire 108). Other dummy patterns (i.e. the patterns next to wire 109) are rectangles with the same length as the squares, but having narrower widths. These are all of the limitations set forth in claims 1-7 of the applicant's invention.

8. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Sato et al. (US 2003/0034567 A1).

Referring to Fig. 2 and paragraphs [0029] to [0039], Sato et al. disclose a semiconductor device with a wiring level that includes wiring layers (70, 71) and square dummy patterns (30). Some of the dummy patterns (30) located at the edge of element forming region (1100) are truncated as shown in Fig. 2 and, accordingly, are shaped like rectangles with the same length as the squares, but having narrower widths. These are all of the limitations set forth in claims 1-7 of the applicant's invention.

### ***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chao et al., Ushiyama, Kawashima et al., Kling et al., and Schmidt et al. teach dummy structures that feature plural types of dummy patterns with different sizes.

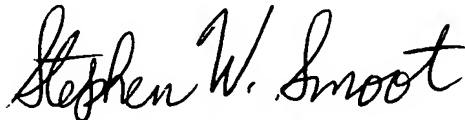

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen W. Smoot whose telephone number is 571-272-1698. The examiner can normally be reached on M-F (8:00 am to 4:30 pm).
